(Royal Society lecture)

What is algorithmic bias?

- System generated or reinforced difference between groups
 - Directly encoded
 - Indirectly encoded
 - Biased training data
- Where might this emerge?

Use of Facebook targeting on job ads could violate Canadian human rights law, experts warn

Ads targeting specific age ranges or genders could be offside, say employment lawyers

Amazon Shut Down Recruiting AI for Sexist Results

After examining patterns from job applications over 10 years, most of which were from Amazon's system started penalizing women and ranking them lower.

KEY POINTS

- A 2017 Deloitte report found 33 percent of survey respondents already use some form of A.I. in the hiring process to save time and reduce human bias.
- This year about 38 percent of Americans will be looking for a new job, according to a report by Glassdoor.
- A number of start-ups and companies now offer A.I. recruitment tools.

Screening Algorithms

- Amazon's failed resume screener
 - Ranked resumes on 1-5 scale
 - Trained on 10 years of previously submitted resumes
 - Systematically chose male applicants
 - Downgraded both common skills for the job and many terms that included 'women's' (i.e. 'women's hockey team') and all-women universities
 - Emphasized language common to C.V.s submitted by men

Interviewing Software

- [HireVue](#)
- Can you infer emotions, behaviors, identities from facial structure and expressions?
 - Not in any sort of [reliable](#) way across contexts and individuals

What is algorithmic management?

- Encoded, automatic decision-making, monitoring and matching systems that operate in real time
 - Often remote
- **Management**
 - Monitoring
 - Performance measurement
 - Scheduling
- **New forms of employment**
 - i.e. selling labour on a platform
 - Remote performance: Amazon MTurk
 - Local performance: driving, food delivery

Algorithmic Control

- Kellogg et al. (2019) draw on Edwards (1979) to explain how algorithmic management differs from previous modes of control
 - **Rational:** appeal to employee self-interest (monetary incentives; Tayloristic approach)
 - **Technical:** physical & technological aspects of production
 - **Bureaucratic:** standardized rules and roles to guide behaviour
- Managers exert control in 3 ways:
 - **Directing:** specify the tasks to be done, order, timing, accuracy
 - **Evaluating:** review performance, assess work, find mistakes
 - **Disciplining:** punishment and reward to enforce compliance

Algorithmic Control

- Comprehensive
- Instantaneous
- Interactive
- Opaque

The advertisement features a blue-tinted background image of a multi-level highway interchange with cars in motion. Three white location pin icons are overlaid on the image. In the bottom right corner, there is a laptop displaying a dashboard with various charts and graphs, and a tablet showing a map with a highlighted route. The text 'THE MOST ADVANCED GPS FLEET TRACKING SOLUTION AVAILABLE' is written in large, bold, white, uppercase letters. Below it, the phrase 'CUT COSTS AND BOOST PRODUCTIVITY' is written in smaller, white, uppercase letters. At the bottom left, there is a white button with the text 'LEARN MORE' in red, uppercase letters, followed by a red right-pointing arrow.

**THE MOST ADVANCED GPS FLEET
TRACKING SOLUTION AVAILABLE**

CUT COSTS AND BOOST PRODUCTIVITY

LEARN MORE ►

Directing

- **Technical:** task sequencing, deskilling, specialization → machine directs work
- **Bureaucratic:** job descriptions, rules, established roles, scripts, checklists
- **Algorithmic**
 - Recommending
 - Restricting

Evaluating

- **Technical:** record length to complete tasks, productivity, accuracy, breaks
- **Bureaucratic:** direct observation, standardized metrics
- **Algorithmic**
 - Recording
 - Rating

Disciplining

- **Technical:** firing and swift replacement (backup workers)
- **Bureaucratic:** incentives/penalties; promoted or fired according to rules, policies, schedules
- **Algorithmic**
 - Replacing
 - Rewarding

Concluding Remarks

- Technological change, as always, will reshape the workplace
 - Immediate impact on individual workers will depend on policy response, employer desires, and worker pushback & organizing
 - Education may provide one avenue to employment and earnings or to avoid particularly bad labour markets
- Good luck!
